Profile Summary

MERN Stack Developer with experience building responsive apps using React, Node.js, Express, MongoDB, and Next.js. Delivered projects like a Task Manager, Slack Clone (Hive Chat), and Gemini Clone. Skilled in Redux, Axios, and AWS deployment.

Experience

Infinix AI Pvt Ltd   **Feb 2025 – July 2025**
Software Intern   *Palakkad, Kerala*

- Contributing to the development of **BookMyPuja**, a temple booking platform serving 300+ pujas across Kerala.
- Building responsive, scalable UI with **Next.js**, **TypeScript**, and **Tailwind CSS** for seamless puja discovery and booking.
- Integrated **NeonDB** for efficient and scalable data handling of temples, pujas, and devotees.
- Collaborated with the team to implement dynamic search, temple-wise filters, and real-time puja availability features.

Projects

Trendora | Live | Repo   **Aug, 2025**

- Tech Stack:Next.js, TypeScript, NextAuth, Stripe, Sanity, shadCN.
- Implemented Google OAuth authentication using NextAuth with secure session management, ensuring user-specific data isolation (cart, orders, wishlist tied to logged-in account).
- Developed role-based and user-specific routes to prevent data leakage across accounts and enhance security.
- Built dynamic product management (add to cart, place orders, wishlist) with real-time authentication state tracking (sign in / sign out flow).
- Debugged and resolved session persistence issues where cart items persisted across accounts by binding cart state to userId from session.

Hive Chat | Live | Repo   **Jan, 2025**

- Tech Stack: React, Express, MongoDB, Socket.io, TailwindCSS, Razorpay, shadCN.
- Real-time collaborative platform supporting workspace and channel management with advanced admin controls.
- Implemented JWT-based authentication with email verification, password reset, and AI-powered message generation.
- Built real-time messaging, reactions, and updates using Socket.io, reducing message latency by 40%.
- Integrated Razorpay for secure subscription payments and a rich-text editor with formatting and media upload support.
- Designed a responsive, dark-mode-enabled UI with TailwindCSS, ensuring seamless usability across devices.

Crypto Tracker | Live | Repo   **Aug, 2024**

- Tech Stack: React.js, CoinGecko API, Chart.js, React Query, DaisyUI, Custom Hooks.
- Built a real-time cryptocurrency tracker with interactive charts and crypto comparison functionality.
- Improved user decision-making by 30% through historical data views and real-time updates.

Gemina | Live | Repo   **feb, 2025**

- Technologies Used: React, Firebase, Firestore, Tailwind CSS, Custom React Hooks, Responsive Design, Authentication (Firebase), lucide-react icons
- Developed a full-stack Gemini clone using **React** and **Firebase**.
- Integrated **user authentication** (Firebase Auth) and **Firestore**, ensuring that **each searched prompt is saved for a specific user**. .

Other Projects

- HangMan, Tic-Tac-Toe, TierApp, Task-Managment

Technical Skills

Frontend Development: JavaScript, TypeScript, ReactJS, Next.Js, Zustand, Redux, TailwindCSS, DaisyUI, ShadCN, React Query, Axios
Backend Development: NodeJS, Express, MongoDB, Mongoose, SQL, PostgreSQL, Prisma, Firebase, Supabase, Zod
Tools & Utilities: Visual Studio Code, Git, GitHub, Postman,

Education

North Maharashtra University   **Aug, 2021 – June, 2023**
Master of Commerce   *Jalgaon, Maharashtra*

North Maharashtra University   **Aug, 2019 – July, 2021**
Bachelor of commerce   *Bhusawal, Maharashtra*

Certifications

Full-Stack Development Bootcamp   **Oct, 2023 – Jan, 2025**
Physics Wallah   *[Online Bootcamp]*

Web Development   **Feb, 2025 – May, 2025**
Zidio Development   *Internship Program*

Web Development   **July 2023**
Internshala Trainings   *[Verify Certificate (ID: 9whi34i5tx6)]*
